

Our vision is to create a secure, centralized platform that seamlessly integrates data from multiple sources. It streamlines CBAM reporting by automating supplier data collection, ensuring real-time accuracy, improved efficiency, and full regulatory compliance."

**Emission Core offers a powerful digital solution for EU importers to automate their CBAM reporting requirements. With an intuitive Exporter Portal, non-EU suppliers can securely share legally compliant product-level data, streamlining collaboration and ensuring full compliance with EU CBAM regulations.**

# WHAT WE DO FOR YOU

## 1. Effortless supplier data collection for CBAM compliance

Automate the entire process of gathering supplier data to meet CBAM requirements. Save time and reduce errors with intelligent data collection tools.

## 2. Simplified data entry with intuitive upload features

Seamlessly upload and manage CBAM-related data through an easy-to-use interface designed for efficiency and accuracy.

## 3. Advanced emissions allocation made simple

Leverage powerful automation to allocate emissions across your supply chain with precision, ensuring compliance and transparency.

## 4. Instant emissions calculation for Regulatory reporting

Automatically calculate carbon emissions in real-time, helping your business stay ahead of CBAM regulations with minimal effort.

## 5. Powerful and user-friendly analytics dashboard

Visualize key metrics and track your compliance progress through an interactive and intuitive dashboard, customized to your business needs.

Empowering compliance,  
driving sustainability.
